

Forest field airport Link **MEngS**

Engineering, Design, instalation, Test and Commissioing

The Forrest Field-Airport Link (FAL) project will deliver an 8.5 km extension of the existing PTA urban rail network in Perth, MEngS scope of work in this project was Engineering (including Equipment selection), cover the design gap, installation and test and commissioning of Sixteen, 22kv substation for 22kv Reticulation system for this project. MEngS has provided this service through Salini. The project last two years and finished successfully in 2022.

In this project MEngS has to provide a solution for lots of gaps in design and project requirement.

Arman Vakili and Bahador Zamanifar were two MEngS key engineers involved in this project.
